

EC Safety Data Sheet

according to regulation (EC) no. 1907/2006, Article 31

Sulfite-2

Printing date: 25. 09. 2023

Version number 24

Page 1 von 10

SECTION 1: Identification of the substance/mixture and of the company/undertaking

1.1 Product identifier

Sulfite-2

Catalog number:

424358, 419211, 424358-0, 419211-0

1.2. Relevant identified uses of the substance or mixture and uses advised against

Application of the substance / the preparation:

Reagent for water analysis

1.3. Details of the supplier who provides the safety data sheet

Company name:	CERTUSS Dampfautomaten GmbH & Co. KG
Street:	Hafenstr. 65
City:	D-47809 Krefeld
Phone:	+49 (0) 2151 578-0
Contact partner:	Mr. Hamacher
E-mail:	t.hamacher@certuss.com
Informing department:	Technical Director
Monday to Thursday from 9 – 16 (9 a.m. to 4 p.m.), Friday 9 – 14 (9 a.m. to 2 p.m.)	
Emergency number	+44 1235 239670. Languages: English

SECTION 2: Hazards identification

2.1 Classification of the substance or mixture

Classification according to Regulation (EC) No 1272/2008

GHS08 health hazard

STOT RE 2 H373 May cause damage to the thyroid through prolonged or repeated exposure. Route of exposure: Oral.

2.2 Label elements

Labelling according to Regulation (EC) No 1272/2008

The product is classified and labelled according to the GB CLP regulation.

Hazard pictograms

GHS08

Signal word

Warning

Hazard-determining components of labelling:

potassium iodide

Hazard statements

H373 May cause damage to the thyroid through prolonged or repeated exposure. Route of exposure: Oral.

Precautionary statements

P264 Wash hands thoroughly after handling.

P314 Get medical advice/attention if you feel unwell.

EC Safety Data Sheet

according to regulation (EC) no. 1907/2006, Article 31

Sulfite-2

Printing date: 25. 09. 2023

Version number 24

Page 2 von 10

2.3 Other hazards

The main intake pathways of potassium iodide are: inhalation of dust and solution aerosols, as well as oral ingestion.

Results of PBT and vPvB assessment

This mixture does not contain any substances that are assessed to be persistent, bioaccumulative and toxic (PBT) or very persistent and very bioaccumulative (vPvB), according to the criteria given in Annex XIII of Regulation (EC) No. 1907/2006.

Determination of endocrine-disrupting properties

The product does not contain substances with endocrine disrupting properties.

SECTION 3: Composition/information on ingredients

3.2 Mixtures

Description:

aqueous solution

Dangerous components			
CAS: 7681-11-0	potassium iodide	 STOT RE 1, H372	2.5 – 5 %
EINECS: 231-659-4			
Reg.nr.: 01-2119966161-40-XXXX			

Additional information

For the wording of the listed hazard phrases refer to section 16.

SECTION 4: First aid measures

4.1 Description of first aid measures

General information

Instantly remove any clothing soiled by the product.

After inhalation

Supply fresh air; consult doctor in case of symptoms.

After skin contact

Instantly wash with water and soap and rinse thoroughly.

After eye contact

Rinse opened eye for several minutes under running water (at least 15 min). If symptoms persist, consult doctor.

After swallowing

Rinse out mouth and then drink 1-2 glasses of water.

In case of persistent symptoms consult doctor.

4.2 Most important symptoms and effects, both acute and delayed:

irritations

after swallowing of large amounts:

headache

absorption

weakness

4.3 Indication of any immediate medical attention and special treatment needed:

Absorption: in case of iodine hypersensitivity, even after relatively low doses, acute respiratory and cardiovascular disorders (possibly shock), skin and mucous membrane reactions possible. (GESTIS)

Symptoms of poisoning may even occur after several hours.

SECTION 5: Firefighting measures

5.1 Extinguishing media

Suitable extinguishing agents

Use fire fighting measures that suit the environment.

EC Safety Data Sheet

according to regulation (EC) no. 1907/2006, Article 31

Sulfite-2

Printing date: 25. 09. 2023

Version number 24

Page 3 von 10

5.2 Special hazards arising from the substance or mixture

The product is not combustible.

Formation of toxic gases is possible during heating or in case of fire.

Can be released in case of fire:

Hydrogen iodide (HI)

5.3 Advice for firefighters

Protective equipment:

Wear self-contained breathing apparatus.

Wear full protective suit.

Additional information

Collect contaminated fire fighting water separately. It must not enter drains.

Dispose of fire debris and contaminated fire fighting water in accordance with official regulations.

Ambient fire may liberate hazardous vapours.

SECTION 6: Accidental release measures

6.1 Personal precautions, protective equipment and emergency procedures

Advice for non-emergency personnel:

Wear protective equipment. Keep unprotected persons away.

Ensure adequate ventilation

Advice for emergency responders:

Protective equipment: see section 8

6.2 Environmental precautions:

Do not allow product to reach sewage system or water bodies.

6.3 Methods and material for containment and cleaning up:

Ensure adequate ventilation.

Absorb with liquid-binding material (sand, diatomite, universal binders).

Dispose of contaminated material as waste according to item 13.

6.4 Reference to other sections

See Section 8 for information on personal protection equipment.

See Section 13 for information on disposal.

SECTION 7: Handling and storage

7.1 Precautions for safe handling

Advice on safe handling:

Prevent formation of aerosols.

Hygiene measures:

Take off immediately all contaminated clothing.

Wash hands during breaks and at the end of the work.

Do not eat, drink or smoke when using this product.

7.2 Conditions for safe storage, including any incompatibilities

Requirements to be met by storerooms and containers:

Store in cool location.

Information about storage in one common storage facility:

Not required.

Further information about storage conditions:

Protect from heat and direct sunlight.

Protect from the effects of light.

EC Safety Data Sheet

according to regulation (EC) no. 1907/2006, Article 31

Sulfite-2

Printing date: 25. 09. 2023

Version number 24

Page 4 von 10

Protect from humidity and keep away from water.

Recommended storage temperature:

20°C +/- 5°C

7.3 Specific end use(s)

No further relevant information available.

SECTION 8: Exposure controls/personal protection

8.1 Control parameters**Components with limit values that require monitoring at the workplace:**

The product does not contain any relevant quantities of materials with critical values that have to be monitored at the workplace.

DNELs

Derived No Effect Level (DNEL)

CAS: 7681-11-0 potassium iodide		
Oral	DNEL	0.01 mg/kg /bw/d (Consumer / acute / systemic effects) 0.01 mg/kg /bw/d (Consumer / long-term / systemic effects)
Dermal	DNEL	1 mg/kg /bw/d (Worker / long-term /systemic effects) 1 mg/kg /bw/d (Consumer / long-term / systemic effects)
Inhalative	DNEL	0.07 mg/m ³ (Worker / long-term /systemic effects) 0.035 mg/m ³ (Consumer / long-term / systemic effects)

PNECs

Predicted No Effect Concentration (PNEC)

CAS: 7681-11-0 potassium iodide	
PNEC	0.007 mg/l (Fresh water)
PNEC	00.075 mg/kg (Aquatic intermittent release)
	0.007 mg/kg /sediment (Fresh water sediment)

Additional information:

The lists that were valid during the compilation were used as basis.

8.2 Exposure controls**Engineering measures:**

Technical measures and appropriate working operations should be given priority over the use of personal protective equipment. See item 7.

Individual protection measures, such as personal protective equipment

Protective clothing should be selected specifically for the workplace, depending on concentration and quantity of the hazardous substances handled.

Eye/face protection

Safety glasses

use against the effects of fumes / dust

Use safety glasses that have been tested and approved in accordance with government standards such as EN 166.

Hand protection

Preventive skin protection by use of skin-protecting agents is recommended.

After use of gloves apply skin-cleaning agents and skin cosmetics.

Material of gloves

nitrile rubber, NBR

Recommended thickness of the material: ≥ 0.11 mm**Penetration time of glove material**

Value for the permeation: Level = 1 (< 10 min)

The exact break trough time has to be found out by the manufacturer of the protective gloves and has to be observed.

Other skin protection (body protection):

Protective work clothing.

EC Safety Data Sheet

according to regulation (EC) no. 1907/2006, Article 31

Sulfite-2

Printing date: 25. 09. 2023

Version number 24

Page 5 von 10

Breathing equipment:

Use breathing protection against the effects of fumes/dust/aerosol.

Recommended filter device for short term use:

Filter P2

Environmental exposure controls

Do not allow product to reach sewage system or water bodies.

SECTION 9: Physical and chemical properties

9.1 Information on basic physical and chemical properties

Physical state	Fluid
Form:	Solution
Colour:	Whitish
Odour:	Odourless
Odour threshold:	Not applicable.
Melting point/Freezing point:	Not determined.
Boiling point or initial boiling point and boiling range	Not determined.
Flammability	The product is not combustible.
Explosive properties:	Product is not explosive.
Lower and upper explosion limit	
Lower:	Not applicable.
Upper:	Not applicable.
Flash point:	Not applicable.
Ignition temperature:	Not applicable.
Decomposition temperature:	Not determined.
pH at 20°C	7.4
Kinematic viscosity	Not determined.
Solubility	
Water:	Fully miscible
Partition coefficient n-octanol/water (log value)	Not applicable (mixture).
Vapour pressure:	Not determined.
Density and/or relative density	
Density at 20°C:	1.03 g/cm ³
Relative density:	Not determined.
Relative gas density	Not determined.
Particle characteristics	Not applicable (liquid).

9.2 Other information

Information with regard to physical hazard classes

Corrosive to metals	Void
---------------------	------

Other safety characteristics

Oxidising properties:	none
-----------------------	------

Additional information

Solids content:	< 5 %
Solvent content:	
Organic solvents:	0 %
Water:	< 95 %

EC Safety Data Sheet

according to regulation (EC) no. 1907/2006, Article 31

Sulfite-2

Printing date: 25. 09. 2023

Version number 24

Page 6 von 10

SECTION 10: Stability and reactivity

10.1 Reactivity

see section 10.3

10.2 Chemical stability

Stable at ambient temperature (room temperature).

10.3 Possibility of hazardous reactions

Reacts with oxidizing agents

10.4 Conditions to avoid

No further relevant information available.

10.5 Incompatible materials:

No further relevant information available.

10.6 Hazardous decomposition products:

see section 5

SECTION 11: Toxicological information

11.1 Information on hazard classes as defined in Regulation (EC) No 1272/2008

Acute toxicity

Based on available data, the classification criteria are not met.

LD/LC50 values that are relevant for classification:

CAS: 7681-11-0 potassium iodide		
Oral	LD50	2779 mg/kg (rat)
Dermal	LD50	3160 mg/kg (rabbit)
	NOAEL	0.01 mg/kg /bw/d (human) organ: Thyroid

Skin corrosion/irritation

Based on available data, the classification criteria are not met.

Serious eye damage/irritation

Based on available data, the classification criteria are not met.

Respiratory or skin sensitisation

Based on available data, the classification criteria are not met.

Information on components:

The following applies to iodides in general: Sensation possible at predisposed persons.

Germ cell mutagenicity

Based on available data, the classification criteria are not met.

Carcinogenicity

Based on available data, the classification criteria are not met.

Reproductive toxicity

Based on available data, the classification criteria are not met.

Information on components:

OECD 414: Teratogenicity testing

OECD 473: Mutagenicity testing

OECD 471, 474, 476, 487: Germ cell mutagenicity testing

CAS: 7681-11-0 potassium iodide	
OECD 471	(negative) (Bacterial Reverse Mutation Test - Ames test)
OECD 476	(negative) (In Vitro Mammalian Cell Gene Mutation Test) Mouse (lymphoma L5178Y cells)

according to regulation (EC) no. 1907/2006, Article 31

Sulfite-2

Printing date: 25. 09. 2023

Version number 24

Page 7 von 10

STOT (specific target organ toxicity) -single exposure

Based on available data, the classification criteria are not met.

STOT (specific target organ toxicity) -repeated exposure

May cause damage to the thyroid through prolonged or repeated exposure. Route of exposure: Oral.

Aspiration hazard

Based on available data, the classification criteria are not met.

Information on likely routes of exposure

„Main routes of exposure:

At workplaces, intake of potassium iodide (KI) is most likely to occur via the respiratory tract.

Outside the workplace, iodides are ingested with food (essential) and sometimes with medications.

Respiratory tract: KI can be inhaled as dust or aerosol from solutions. Inhalation studies were conducted with particulate aerosols containing sodium iodide using various animal species (monkey, mouse, sheep). Rapid and effective absorption via the respiratory tract was observed. This is also assumed for KI as its solubility is comparable.

Skin: From tests on volunteers who had an aqueous KI solution applied to their forearms (12.5 cm²), the amount of iodine absorbed was estimated at 0.1%. Absorption through the skin is therefore considered to be of little relevance.

Gastrointestinal tract: Soluble iodide is absorbed almost entirely via the gastrointestinal tract. This has been proven by results of studies with KI on adult volunteers.“ [GESTIS]

Additional toxicological information:

CAS: 7681-11-0 potassium iodide

(source: GESTIS)

Main Toxic Effects:

Acute: Irritation to the eyes, skin and airways, disturbance of thyroid function, cardiovascular effects, metabolic disturbances. Chronic: Disturbance of thyroid function, systemically conditioned skin damage and inflammation of the mucous membranes.

Further Information (GESTIS, Merck):

Small amounts of iodine are essential for the body. However, long-term overdoses of iodine lead to disturbances in the thyroid function (hypo- and/or hyperthyroidism, possibly accompanied by thyroiditis). The effects are very complex.

Furthermore, symptoms of chronic iodine poisoning (iodine toxicosis, „iodism“) can occur following intake of high doses of predisposed persons. They mainly consist of systemically conditioned irritation/inflammatory changes to the mucous membranes and skin.

Iodide crosses the placenta and, when administered (orally) to pregnant women in very high doses, can lead to hypothyroidism and/or goiter in the fetus with deaths from tracheal compression

11.2 Information on other hazards

Endocrine disrupting properties

None of the ingredients is listed.

Other information

Other dangerous properties can not be excluded.

According to the information available to us, the chemical, physical and toxicological properties of the substances mentioned in Chapter 3 have not been thoroughly investigated.

SECTION 12: Ecological information

12.1 Toxicity

Aquatic toxicity:

CAS: 7681-11-0 potassium iodide	
EC50	7.5 mg/l/48h (Daphnia magna) (OECD 202) Merck
LC50	3780mg/l/96h(rainbowtrout)(OECD203) Merck

12.2 Persistence and degradability

No further relevant information available.

12.3 Bioaccumulative potential

No further relevant information available.

not regulated

Regulation (EC) No 273/2004 on drug precursors

None of the ingredients is listed.

Regulation (EC) No 111/2005 laying down rules for the monitoring of trade between the Community and third countries in drug precursors

None of the ingredients is listed.

Regulation (EC) No 1005/2009 on substances that deplete the ozone layer:

None of the ingredients is listed.

REGULATION (EU) 2019/1021 on persistent organic pollutants (POP)

None of the ingredients is listed.

LIST OF SUBSTANCES SUBJECT TO AUTHORISATION (ANNEX XIV)

None of the ingredients is listed.

Substances of very high concern (SVHC) according to REACH, Article 57

This product does not contain any substances of very high concern above the legal concentration limit of $\geq 0.1\%$ (w / w).

Directive 2012/18/EU (SEVESO III):

Named dangerous substances - ANNEX I

None of the ingredients is listed.

REGULATION (EC) No 1907/2006 ANNEX XVII

Conditions of restriction: 3

Information about limitation of use:

Employment restrictions concerning young persons must be observed (94/33/EC).

15.2 Chemical safety assessment:

A Chemical Safety Assessment has not been carried out.

SECTION 16: Other information

These data are based on our present knowledge. However, they shall not constitute a guarantee for any specific product features and shall not establish a legally valid contractual relationship.

Training hints

Provide adequate information, instruction and training for operators.
