

Dear customer,

The CERTUSS Dampfautomaten GmbH & Co. KG is always endeavored to only deliver flawless products. Nevertheless, repair returns can never be completely avoided. To be able to process the return and RMA processing rapidly and swiftly, we would like to ask you to be sure to comply with the following procedure:

- Please make sure that there really is an actual defect before return delivery. For unjustified claims we calculate a test and processing fee of Euro 100.

Further costs may occur if parts have to be checked at the sub-supplier.

- Transport damage should be reported immediately to the relevant transport companies.
- If not available, you can download the RMA form from the Internet. <https://www.certuss.com/downloads>  
The required RMA number and/or the form can also be requested under [Service@certuss.com](mailto:Service@certuss.com) or alternatively under +49 (0)2151 578123.
  - Always specify the delivery note number and the CERTUSS part number so that we can assign your claim.  
On working days (Mon-Fri) you receive a confirmation with the RMA number from us within 24 hours, if required.

Return of defective products in a sufficiently thick padding which is suitable for dispatch. Suitable and transport-proof packaging for freight goods.

#### **Required details for return**

RMA number, filled-in RMA form

Always attach the RMA number clearly visible on the outside of the package.

Please enclose the completed RMA form with the package.

Comprehensive error description (on the RMA form or, if required, on a supplementary sheet).

The correct and complete invoice number as well as the correct article description.

Type of desired regulation (this specification is not mandatory for us).

All carriage-forward shipments as well as shipments without RMA number cannot be processed and the acceptance of the shipment will be declined.

The goods are checked and repaired or replaced by us. The repair period may be extended if, for example, spare parts have to be procured or, potentially, a repair is only possible through the corresponding manufacturer/supplier. Information about the processing status is provided by our order processing department ([Versand@certuss.com](mailto:Versand@certuss.com)).

The guarantee expires prematurely if:

The goods were packaged incorrectly and dispatched.

The specifications during the commissioning or during operation were not complied with, damage occurred due to external intervention, if there is mechanical damage to the goods or if the instructions in the technical documentation were not followed.

In the case of articles which were modified by the customer, clarification has to be sought with our technical service in advance as to whether they can be analysed or repaired by us. Please specify the name of the customer service representative with whom you discussed the process and please also specify the analysis authorisation on the RS form.

Products that were contaminated with substances harmful to one's health or the environment, must not be sent in and are returned by us unprocessed and you are liable to pay the costs.

Yours sincerely

CERTUSS Dampfautomaten GmbH & Co. KG

Heating system damage:

When the heating system is returned for a damage report or repair quotation, scrapping is automatically ordered if a repair is not ordered within three months of receipt. During this period, CERTUSS will store the heating system free of charge. The e-mail dispatch time stamp applies here. The costs incurred for this, amounting to a flat rate of €250 for the scrapping process, will be charged to the returning company. The heating system can be collected from the Krefeld site before the end of the storage period. A chargeable return shipment in unprocessed condition can also be ordered within this period.

**Notes:**

- The shipment is only accepted after previous consultation.
- We charge a processing fee of Euro 100 for unjustified claims.
- We only take back unused and originally packed goods for return/credits.
- No processing without RMA number.

**The fully completed RMA form must be enclosed with the return and the RMA No. must be applied clearly visible on the outside of the package!**

## Declaration of decontamination

Due to statutory regulations on the protection of our employees and operating facilities we require the signed "Declaration of decontamination" before your component can be processed. This must be attached to the outside of the packaging. Otherwise we cannot accept your shipment.
